

Accelerating adoption of innovation by developing clinical leaders

We are equipping frontline staff with the skills they need to make evidence-based change to better meet patient needs. The programme, launched in 2014, is run by the *Oxford Academic Health Science Network* with funding from *Health Education England*.

15

wide-ranging innovators from the NHS frontline are working towards a Masters (MSc) in Evidence-Based Healthcare from the University of Oxford.

This is a really exciting and progressive programme, enabling clinical leaders to develop the skills they need to establish intuitive, personalised health systems for patients.

Joe Harrison

Chief Executive, Milton Keynes University Hospital.
Chair, Oxford AHSN Best Care Oversight Group.

It's a fantastic opportunity. There's nothing like this anywhere else. I'm sharing the skills I've learned with my colleagues and helping to improve the way we work and develop as a team.

Joe Korge
Physiotherapist

I recommend this fellowship without reservation.

Francis Githae Muriithi
Doctor

I have achieved far more than I ever imagined I would be able to.

Deborah Grove
Nurse
