# NHS RightCare Frailty Preview

Annex: existing indicators, not updated

Frimley Health

April 2018

**DATA ARE PRESENTED USING OLD CCG CONFIGURATION (total of 209 CCGs)**

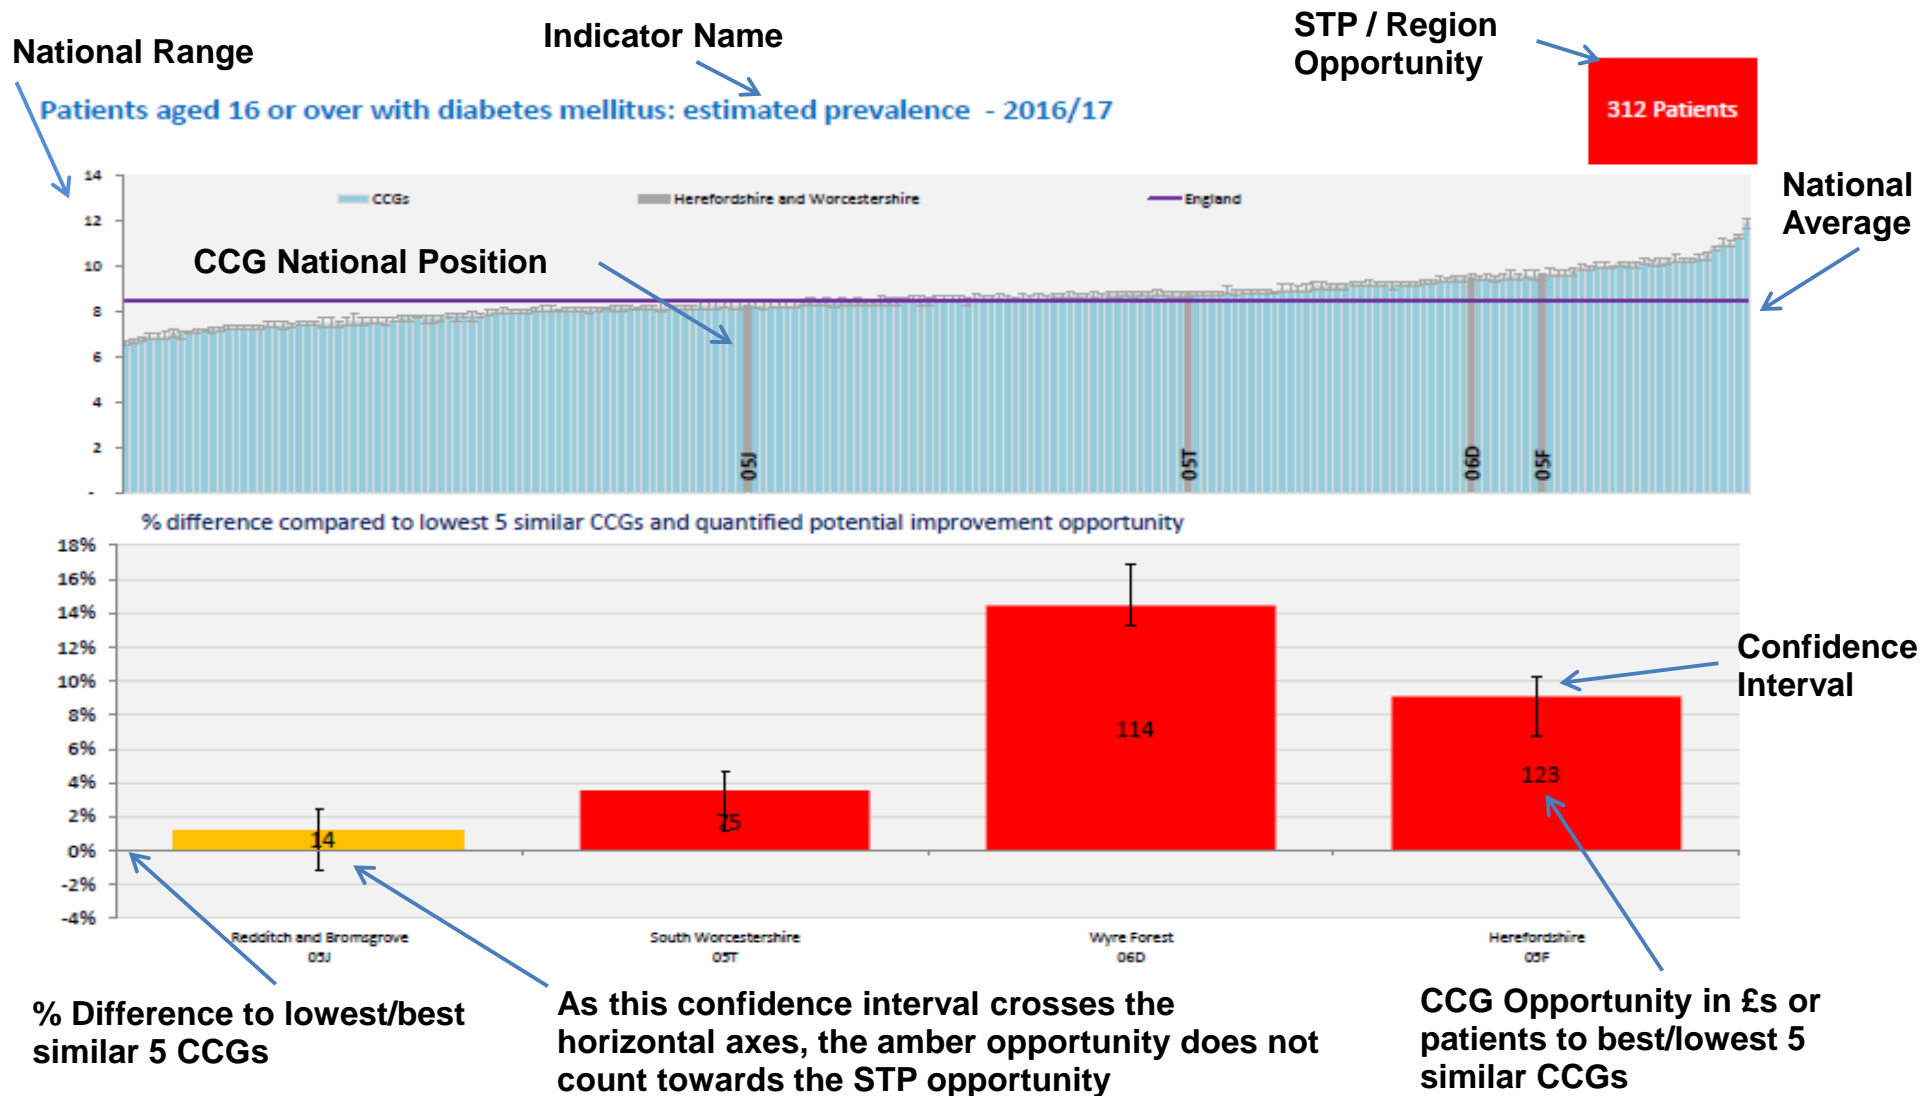

---

# Introduction

NHS RightCare is developing a focus pack for frailty and is currently going through an engagement process to agree the structure and indicator list to be used. The indicator list is expected to include both existing indicators (used in other NHS RightCare packs) and new indicators.

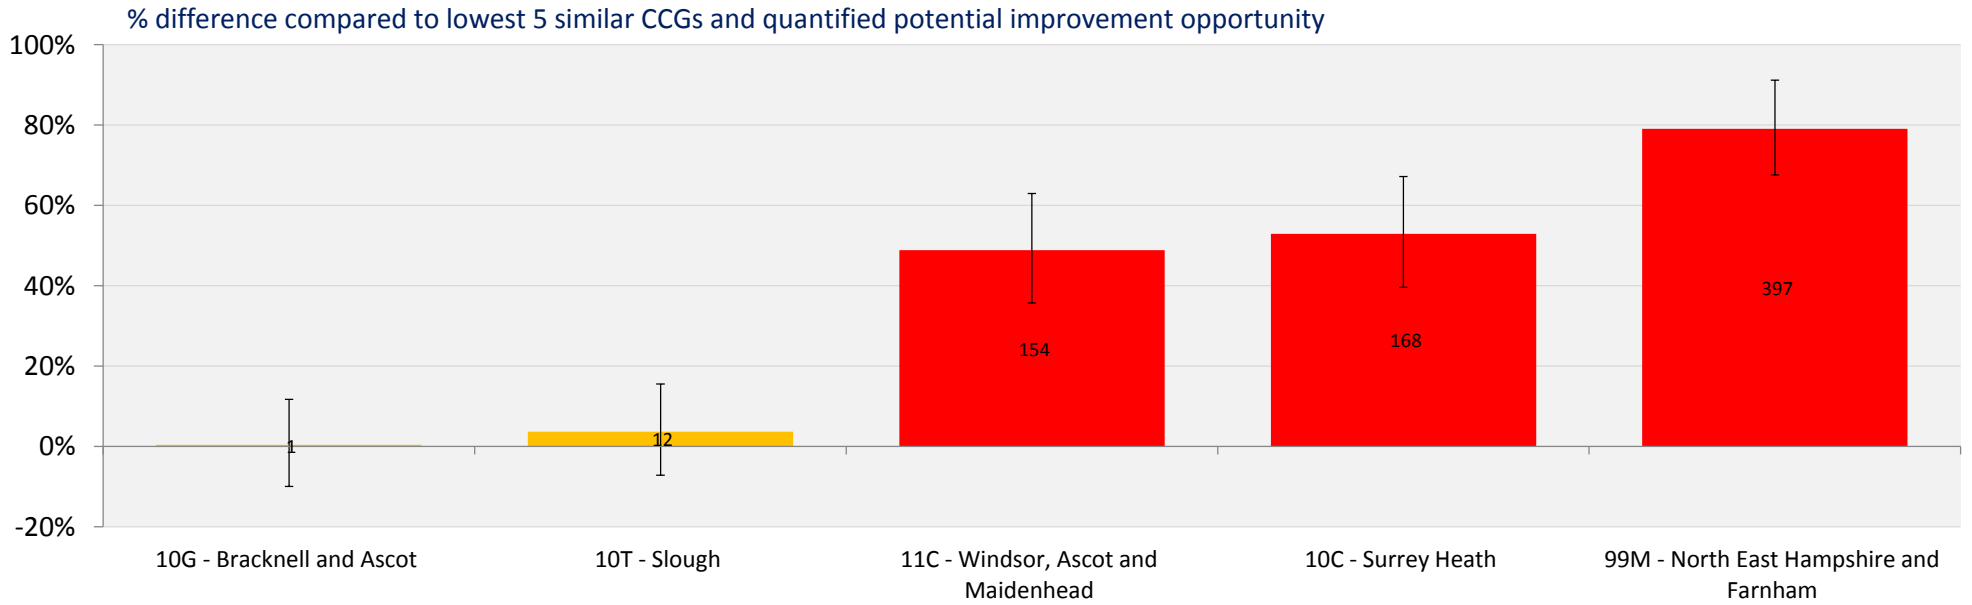

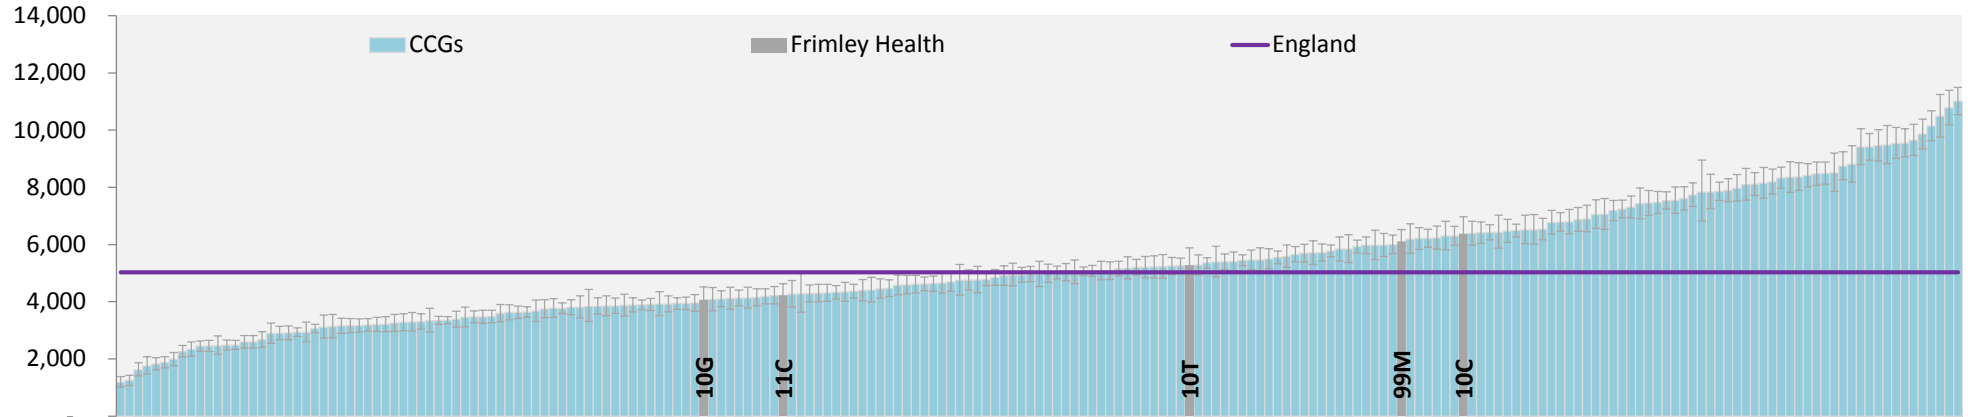

This Frailty Preview Annex presents charts for a selection of relevant existing indicators which have not currently been updated.

# Interpreting the charts

# Rate of emergency admissions aged 75+ with a stay of <24 hrs (per 100,000 pop) - 2012/13

718 Adm.

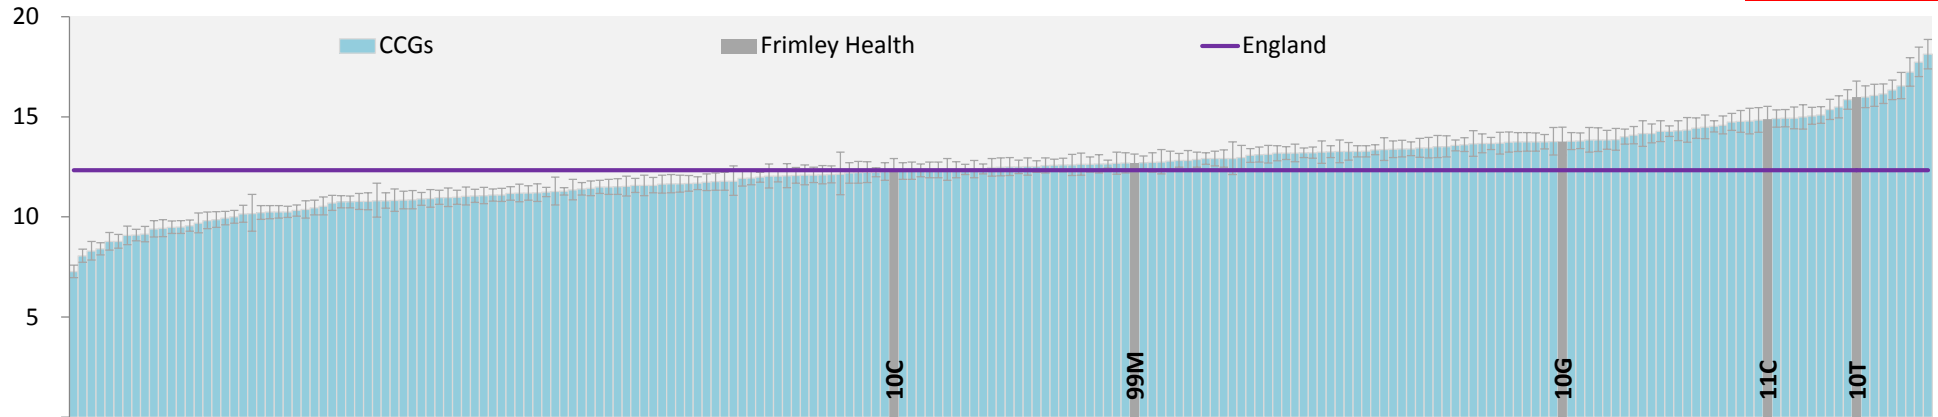

Domain: Secondary Care

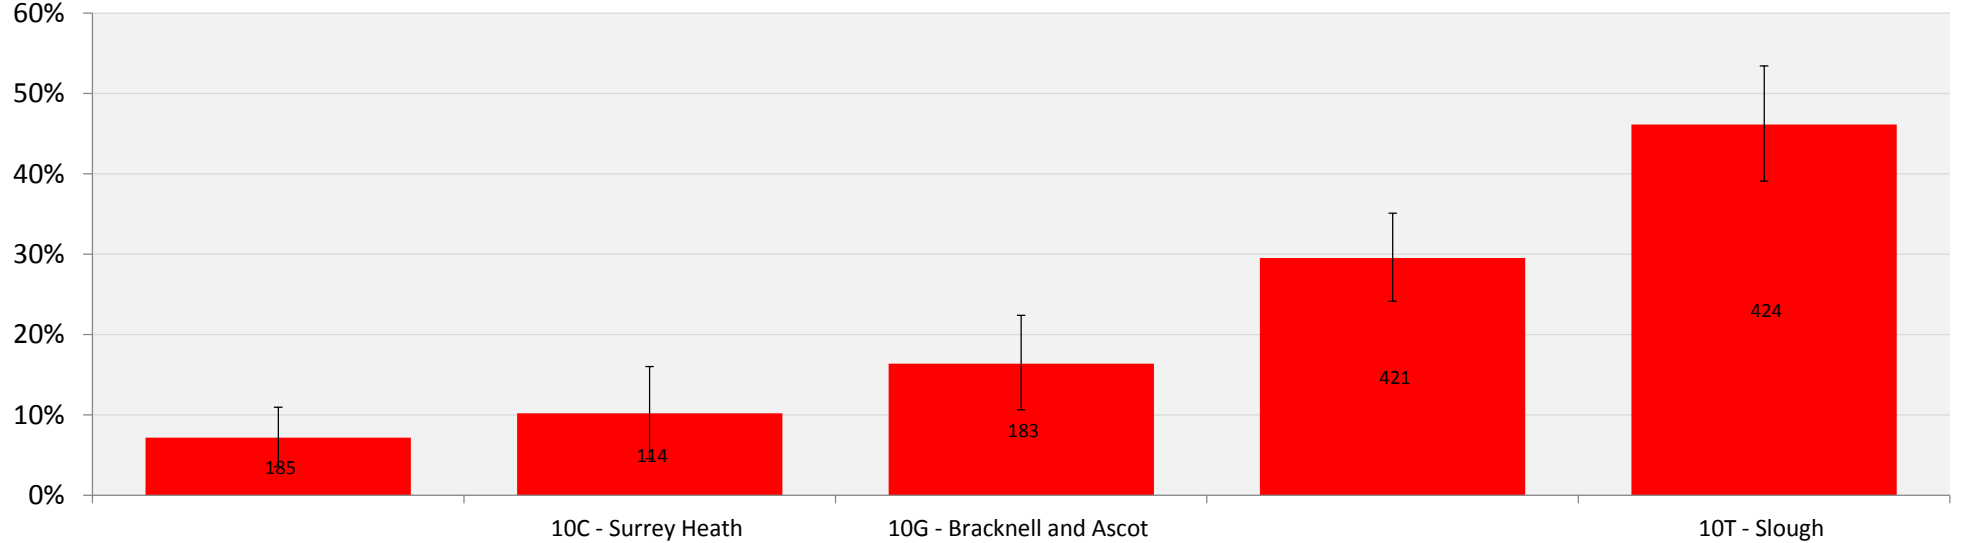

Frimley Health

# Proportion of people aged 65+ in hospital for 10+ days - 2015/16

1,327 Pats.

% difference compared to lowest 5 similar CCGs and quantified potential improvement opportunity

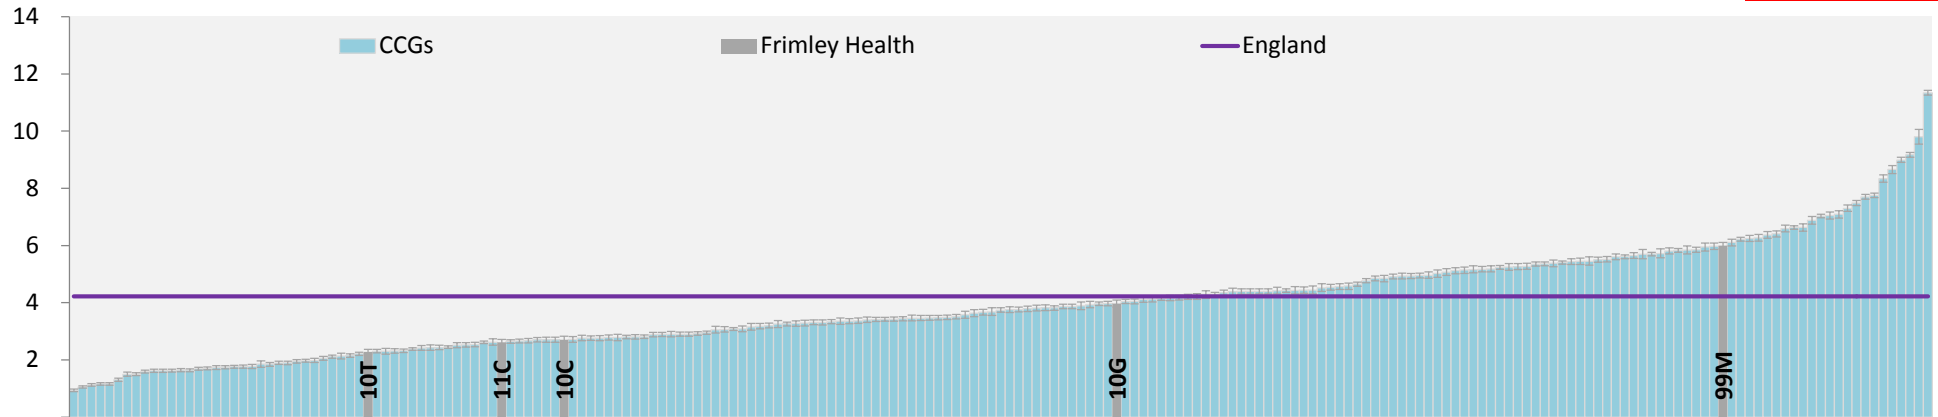

Domain: Secondary Care

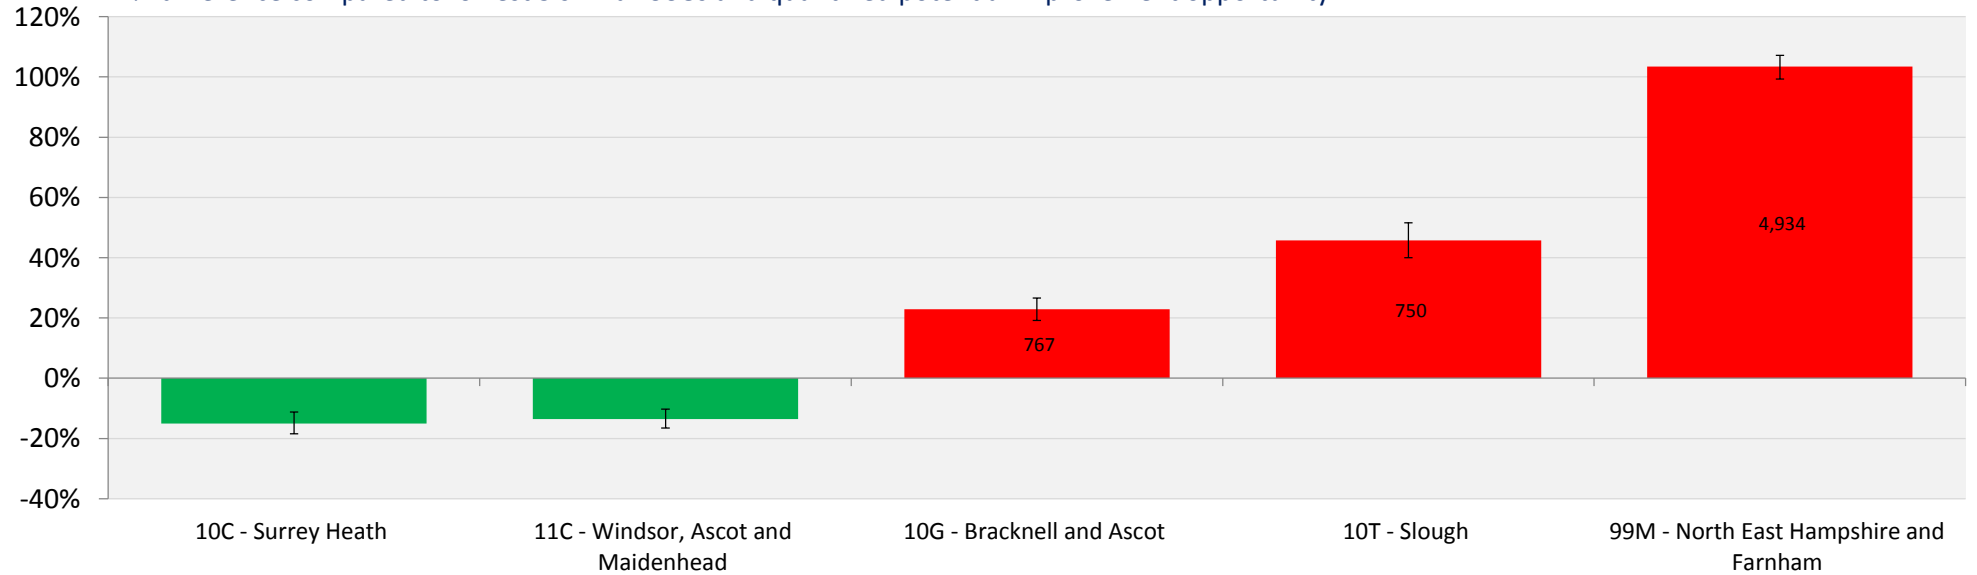

Frimley Health

## Rate of patients with delayed transfers of care (%) - 2014/15

6,450 Pats.

% difference compared to lowest 5 similar CCGs and quantified potential improvement opportunity

Domain: Secondary Care

Frimley Health
